Portfolio | LinkedIn | Behance

Product Designer with over 2 years of experience designing intuitive web and mobile products across healthcare, fintech, SaaS, social networking, and marketplace industries. Experienced in leading end-to-end product design—from discovery and user research to high-fidelity interfaces, design systems, and developer handoff. Skilled at collaborating with cross-functional teams to transform complex business challenges into scalable, user-centered digital experiences. Focused on designing products that deliver measurable value for both users and businesses.

CAREER HIGHLIGHTS

- Sole Product Designer at MEDesy Health.
- Led product design across 5+ digital products at Greall Technology.
- Redesigned and launched the Greall corporate website.
- Built scalable design systems adopted across healthcare, fintech, SaaS, social networking, and marketplace products.
- Designed products across healthcare, fintech, SaaS, marketplaces, and social networking.

PROFESSIONAL EXPERIENCE

Product Designer

MEDesy Solutions (Remote)

Jan 2026 - Present

- Sole Product Designer responsible for the end-to-end design of MEDesy's healthcare website and web application.
- Partnered with product stakeholders, two software engineers, and the growth team to define product direction and deliver user-centered healthcare experiences.
- Expanded the design system with 40+ reusable components, reducing UI duplication and improving consistency across new feature development.
- Conducted interviews and usability testing with 15+ users to identify friction points and validate product decisions.
- Designed responsive healthcare workflows that improved usability, accessibility, and consistency across the web platform.

Product Designer

Greall Technology (Remote)

Oct 2024 - Mar 2026

- Led end-to-end product design across multiple digital products including Greall Socials, Greall Pay, ErrandLink, CryptoSend, and the corporate website.
- Redesigned and launched the Greall corporate website, strengthening the company's online presence and brand consistency.
- Built scalable design systems and reusable UI components adopted across multiple products.
- Collaborated with engineering teams throughout product discovery, design, implementation, and iteration to ensure high-quality product delivery.
- Facilitated design decisions that balanced business goals, user needs, and technical feasibility.
- Led design reviews and collaborated directly with stakeholders to align product decisions with business goals and technical feasibility.

Product Designer (Internship)

Vephla University (Remote)

Feb 2024 – Mar 2025

- Completed an intensive Product Design program focused on solving real-world business problems across fintech, healthcare, and SaaS.
- Delivered more than five end-to-end product design projects covering user research, wireframing, prototyping, and usability testing.
- Earned a full-time Product Designer role before completing the internship program, reflecting strong design capability and professional growth

SELECTED PROJECTS

Will - Digital Legacy Platform: Designed an end-to-end digital legacy platform that enables users to securely organize and transfer digital assets and personal information to trusted beneficiaries through an intuitive planning experience.

Raven Banking: Reimagined a mobile banking experience by simplifying money transfers, account management, and financial dashboards to improve usability and reduce friction.

Spot Feedback: Designed a collaborative feedback platform that helps designers collect structured reviews, manage iterations, and streamline the design critique process.

Meal Prep: Designed a mobile meal planning application that helps busy professionals and students organize weekly meals, manage grocery shopping, and build healthier eating habits through an intuitive user experience.
